VISPONDER®

A BEST FRIEND FOR A STRONGER NOW

Sometimes we encounter people or things that change the world for the better for us – making it healthier. That includes good friends.

And the ViSponder®. He is like a good friend to you and strengthens you physically. In everyday life and in situations where it really matters. Whenever you need him.

Medicine is constantly gaining more comprehensive knowledge about what is happening in our body. That is why, for many **organs and organ systems**, it is known what they need to function well: among other things, **the right frequencies, or subtle structures**. That's exactly what **the ViSponder® holds ready for you and your body.**

EVERY VISPONDER® WORKS WITH BODY-EQUAL* FREQUENCIES TO SUPPORT A SPECIFIC BODY AREA:

VISPONDER® SPORT

for more performance in sports

VISPONDER® BRAIN

for increased brain activities

VISPONDER® FLEXIBILITY

for a strong and fluidly working musculoskeletal system

All three areas stand for a life that we love. Hence the name ViSponder®: “Vi” for “Vita”, the life. “Sponder” for “to respond”, answer or react.

And that is exactly what the ViSponder® does. How? Here is a quick explanation and a more detailed one at the end of the brochure.

*More explanations on page 14.

HOW IT WORKS

UNIQUE AND INSPIRED BY NATURE

The ViSponder® uses what constantly surrounds us: **electromagnetic fields**. These fields also appear naturally. Every living organism is constantly converting energy and thus creating a permanent electromagnetic field.

The **fields interact with each other via electromagnetic frequencies**, for example by reading out data or transfer it from one field to another.

* More explanations on page 14.

THE VISPONDER® DOES THAT AND FAR MORE

1. **Your body gives its individual electromagnetic field constantly to the field of the ViSponders®.** We have different data programmed on the ViSponder®: **body-equal frequencies***, which are relevant for a specific organ system and additionally the data of selected **subtle structures***.
2. The ViSponder® constantly **synchronizes your data** with its own.
3. If an imbalance occurs during the adjustment, the ViSponder® supports you by **sending structured and enriched frequencies** back to you. Thus, **strengthening the selected area**.

WEAR THE VISPONDER® CLOSE TO YOUR BODY

ONE LIKES TO HAVE GOOD FRIENDS CLOSE TO THEM

THE VISPONDER® WORKS:

*We at Vitarights Innovations
redefine the term friendship
bracelet with the ViSponder®*

INDIVIDUALLY

always dependent on
the person carrying it

IMMEDIATELY

close to the body

TARGETED

for a selected physical area

VISPONDER® SPORT

CLOSE FRIEND IN SPORTS

For endurance and strength training. For general fitness, health and the professional sports sector. For training and competition times. Regardless of what type of sport you are doing and for what reasons you train: the ViSponder® Sport does not only make you feel **fitter, but it also helps you perform better.**

Incidentally, this also applies to the moments when you do not play sports. You are more **alert and dynamic**; you can do more – if you want to. With the family. Or with your friends, for example. **Always there for you as a good friend: Your ViSponder® Sport.**

”

“The ViSponder® sport makes me feel fresher, fitter, and simply good. I also wore the bracelet during my Olympic successes in 2022 and don't want to miss it anymore.”

Francesco Friedrich

German record world champion in bobsledding and double Olympic champion 2018 and 2022

Mobilizing energy resources for top performance

Shorter and better recovery periods

Increase of strength and perseverance through optimal muscle and oxygen supply

VISPONDER® BRAIN

CLOSE FRIEND FOR YOUR BRAIN

We encounter challenging situations again and again, sometimes regularly. **High demands at work** for example. **Exams** in schools and universities. Or **declining cognitive abilities** through the course of our lives. It is good to have a friend by our side.

A friend who **supports** us **directly and specifically** in these moments – even during longer periods of time. **A friend like the ViSponder® Brain.** You tell him what you are missing right now, and he will give you what you need. Without words. Simply by being close to your body.

“

*„I remember things a lot **better**, have less memory lapses and less issues finding the right words.“*

*“I feel **immediately safer** through the ViSponder® Brain in terms of daily challenges. I also perceive things more consciously.“*

Increased memory performance through improved cerebral perfusion

Improvement of self-awareness

Promotion of thinking and comprehension skills

VISPONDER® FLEXIBILITY

CLOSE FRIEND FOR YOUR MUSCULOSKELETAL SYSTEM

Do you sit or stand a lot? Or work in a bent posture? Our body is not made for that – but for smooth and varied movements. Our professional everyday life does not always allow this. If you spend hours sitting in front of a computer for example. In certain medical or social professions.

Work in crafts or sales. Standing in front of your easel. Or dancing on the stages of this world. Sounds like you need a good friend. One that supports you in regard of a **flexible and strong musculoskeletal system**. The ViSponder® Flexibility gladly takes on this role for you.

”

„I feel **more flexible** and have **less problems** standing for an extended period of time.“

„My **back situation improves**, **blockages disappear**.“

“The ViSponder® Flexibility helps me to reduce my handicap in golf. **I'm just more flexible.**“

Prevents back problems by strengthening the musculoskeletal system

Supports preservation of mobility through optimized interaction of ligaments, tendons, and joints

Fluid movements through more flexibility and agility

DER VISPONDER®

STUDIES

Scientific proof of the effect of the ViSponders® is important to you? We understand that, since we feel the same way. The Institute for Sport Science and Health Management (ISGM Meppen/Münster) has conducted studies:

VISPONDER® SPORT

- Double-blind study
- Measuring methods: PWC 150, spiroergometric, phase angle, bio cell mass determination

VISPONDER® BRAIN

- Double-blind study
- Measuring methods: baroreceptor sequences (Slopes), stress index (measured with the Task Force® Monitor)

VISPONDER® FLEXIBILITY

- Double-blind study
- Measuring methods: Agility tests included coordination exercises

FAQ

► How exactly does the ViSponder® work?

We hope you like physics. Then here is the more detailed explanation of how the ViSponders® works.

The ViSponder® uses what surrounds us all permanently: electromagnetic fields. These fields occur naturally since every living organism constantly converts energy and thus creates a permanent electromagnetic field. This is measurable: the frequencies that our brain produces, for example, can be measured using an EEG.

At the same time, organisms are bioenergetically open systems. That means: different electromagnetic fields communicate through electromagnetic waves with each other. In this case, for example, data is read out or transferred from one field to another. The electromagnetic waves each oscillate at different frequencies – individual organisms or organs have inherently defined frequencies.

The number of oscillations of electromagnetic waves per second equals the frequency, stated in the unit Hertz (Hz). Our planet earth has a frequency of 7.83 Hertz. It leads to more well-being if we swing in unison with it.

The right frequencies are elementary for us. They determine how well we feel or how efficient we perform. That is the reason why we loaded several body-equal frequencies on the different ViSponders® – and they are supplemented with additional subtle structures. In the right combination for different areas of the body.

If the ViSponder® is close to your body, a constant comparison via the electromagnetic fields takes place. The ViSponder® identifies every millisecond how it can support your body in the selected areas. It then reflects your frequencies in structured and enriched form. He thus brings this physical area into the currently best possible condition.

Notice

The use of the ViSponders® serves to promote well-being – it is not a healing measure and is not a therapy in terms of medical treatment. The ViSponder® cannot replace a visit to a medical professional in case of a suspected illness or general health problems. Please do not interrupt or end a medical treatment unauthorized because you are using the ViSponder®.

► What is unique about the ViSponder®? Bracelets with a function already exist.

It is a careful combination that makes the ViSponder® so unique: body-equal frequencies, additional selected subtle structures, regular synchronization between body and ViSponder® as well as the constant enriching and releasing of frequencies to the body. This is the only reason why the ViSponder® can make a proven impact.

Background: It is well known today, from a scientific point of view, which frequencies, or subtle Structures (or: data) our body needs to be efficient – for example regarding athletically, cognitively or related to the musculoskeletal system. Therefore, every ViSponder® carries the data relevant for a specific area.

A team of therapists and medical professionals have been working a long time on what data the perfect package for each area must be packed with. The different compositions were checked and changed repeatedly – until they were perfect. This has been confirmed by the studies of the Institute for Sports Science and Health Management Meppen/Münster.

► What do the terms body-equal frequencies and subtle structures mean?

Body-equal frequencies are frequencies that the human body (or individual areas or organs) naturally possesses. Every human brain for example has the same frequency – it does not differ from person to person.

The subtle structures are also about frequencies. However, they are not body equal. Each material (such as a supplement) brings its own frequency.

Both are important for our body. That is why we have both forms of frequencies programmed onto the ViSponder®. That is why we also distinguish them linguistically.

► Can I wear several bracelets at the same time to strengthen more than just one area?

It is possible, but we do not recommend it. Your body and the ViSponder® ideally concentrate on one area for a specified period of time before moving on to another.

► What models of the ViSponders® are available?

The ViSponder® is available with a bracelet made of special soft sheepskin in anthracite and different colored silicone straps. The silicone is high quality and skin friendly.

► How long should I keep mybracelet on?

You can wear the bracelet for as long as you like. Important to note is that the ViSponder® works from the moment it is close to your electromagnetic field (up to four centimeters from your body). It gradually builds its effect by constantly verifying your data to its own ideal one, enriching it and sending it back to you. It is possible that you feel this process if you are particularly sensitive. Therefore, test whether you prefer to take off the ViSponder® to sleep.

► Can I put the ViSponder® in a bag?

That depends on the bag. The trouser pocket is possible but not the purse since the ViSponder® is then probably more than four centimeters away from your body and therefore cannot longer work properly.
